Web Development Tips For Web Solutions Management Server (previously RedDot CMS)

One(!) of my current projects is about to have some web development done prior to being built in Web Solutions Management Server (previously RedDot CMS) which has started me thinking about some of the lessons I have learnt through this process previously. Passing these tips on to whomever is doing the web development, whether it be yourself, a colleague or an outside agency should make your job a lot easier!

Telerik RadEditor quirks

The v9 release of RedDot CMS OpenText Web Solutions Management Server has a killer feature: a new text editor based on Telerik RadEditor.Net. And for the most part it rocks. Our authors and editors love it. But there have been a few quirks. Here are the problems we have encountered, and the workarounds.

Adopt Content in Clipboard — help moving content around

Have you ever come across a feature in RedDot that has been there forever, but you'd never used it before? Then you "discover" it and think, "if only I'd known about this earlier, it would have saved so much time..." This is one of those. We discovered the Adopt Content in Clipboard action menu item. Nothing groundbreaking — you

WELCOME TO UNOFFICIAL REDDOT CMS BLOG

RedDot CMS and RedDot LiveServer developers joined forces to bring you tips and tricks to improve your RedDot experiences.
